AI Automations & Data Project Manager

+2 years of experience

About Me

+2 Years turning data into insights and action with AI automation and smart workflows. I leverage **Python, n8n, Make.com, and Zapier** to scrape, analyze data, automate processes, and build solutions that make operations seamless and efficient.

Experience +2 Years

Data & AI Automation PMO
TARGETUP Consulting **Oct 2025- Present**

- Built AI-powered **productions workflows (+30)** using Python, low-code tools, and Odoo, transforming manual processes into scalable systems across CRM, marketing, HR, and business development.
- Reduced content production **time by 50%** through automated multi-platform publishing and AI-generated workflows.
- Developed an AI-driven tender detection and scoring system integrated with Odoo CRM, **cutting manual search time by 90%**.
- Automated multi-source lead generation and CRM routing (**Google, tenders, Apollo, LeadRocks, email, social**), increasing conversion rate from **4% to 60%.**
- Conducted strategic **market research** and **data analysis** to optimize campaigns and support executive decision-making.
- Managed **SEO, GEO, and AI-assisted Meta ads** (image & video) to accelerate campaign deployment.
- **Led a team of 4** (Marketing Specialist, Odoo Developer, 2 interns), aligning automation and CRM systems

Data & Marketing Analyst / Automation Specialist
IFCAR SOLUTIONS **Dec 2024- Oct 2025**

- Increased website SEO performance **by 20%** and social media visibility **by 38%** by building a free AI-powered CV analyzer tool that attracted and engaged job seekers.
- Built an AI CV classifier processing **100+ resumes daily**, reducing recruitment cycle time by **2 days** using n8n and Gemini API.
- Recruited IT profiles (Cybersecurity, Data, Fullstack, Data & AI) with an **80% placement success rate**
- Conducted strategic **market research** to identify hiring trends and competitor demand, enabling proactive talent positioning and strengthening CV-theque acquisition strategy.
